Merge / Consolidate / Append

Merge

- Combines Cells Into One

Consolidate

- Combines Data From Multiple Sheets

Append

- Adds Data One Below Another

EXCEL

GROUPING & OUTLINING DATA

Used To Organize Large Data.

Group

- Groups Rows Or Columns
- Can Hide/Show Details

Example:

- Monthly Sales Grouped Into Yearly Data

Outline

- Shows Summary View
- Expand Or Collapse Data

SUBTOTALS & AGGREGATION FUNCTIONS

Subtotals

Used With Sorted Data

Example:

- Total Sales By Department

Path:

Data → Subtotal

Count Functions

- =COUNT(A1:A10) → Counts Numbers
- =COUNTA(A1:A10) → Counts Non-Empty Cells
- =COUNTBLANK(A1:A10) → Counts Empty Cells

Conditional Count

- =COUNTIF(A:A,"Yes")
- =COUNTIFS(A:A,"Sales",B:B,">50000")

Sum Functions

- =SUM(A1:A10)
- =SUMIF(A:A,"Sales",B:B)
- =SUMIFS(B:B,A:A,"Sales",C:C,">10000")

EXCEL

TABLES (STRUCTURED DATA)

Tables Make Data Clean & Dynamic.

Create Table

Shortcut: Ctrl + T

Structured References

Use Column Names Instead Of Cell Ranges

Example: = SUM(Table1[Sales])

Total Rows

- Automatically Shows Sum, Count, Average
- No Manual Formula Needed

Slicers

- Visual Filters
- Easy Data Filtering With Buttons

Used Mostly In:

- Tables
- Pivot Tables
